

hosted solutions

HROfficeASP is available for customers who want the simplicity, ease-of-use, and comprehensive HR and benefits management capability of HROffice without the traditional day-to-day maintenance of software and hardware. The managed, internet-based infrastructure offers organizations to outsource their HR technology needs. Pick the HROfficeASP package that fits your organization's needs.

HROfficeASP Standard: HR and Benefits Management, Payroll Connect, Applicant Manager, Employee Correspondence Wizard, Attendance, COBRA, Compensation, File Attachments, Customization, Reporting, Org Charting, QuickStart Data Import.

HROfficeASP Premier: Includes all features and functionality provided in the "HROfficeASP Standard" package plus HROffice Self-Service, Online Open Enrollment, and My Paycheck.*

Do away with traditional software and hardware maintenance issues

- HROfficeASP customers reap the benefits of an enterprise application without the large up-front costs involved with purchasing, implementing, and managing an in-house client/server application.
- HROfficeASP pricing is determined solely by active employees in the ASP database. Customers are not charged for terminated or retired employees.
- Microsoft SQL Server platform is part of HROfficeASP so there's no additional software cost to you.
- There is no need to purchase Internet Information Server for Employee Self-Service; it too comes included with the product.
- HROfficeASP is extremely secure and utilizes the latest security technologies.
- Each customer utilizing HROfficeASP is subject to role-based security definitions at the application level and database security at the database level. No user has direct access to the database.

Hassle-Free installation, upgrades and ongoing maintenance

- Basic HROfficeASP is a one-time required service and includes ASP account creation, a two-hour online Introductory Training Course, and Payroll Connect Jumpstart.
- Support and Maintenance services include unlimited calls and emails to Ascentis technical support, new product releases, software updates, and documentation updates.
- Upgrades are included in monthly fees and require no IT intervention as they happen behind-the-scenes. Automatic upgrades means users are always running the most current version of HROffice.
- Additional customized implementation and Professional Services are available upon request.

VeriCenter is the service behind HROfficeASP. VeriCenter is one of the largest profitable enterprise managed services provider in the United States, delivering advanced operating infrastructure for hosting critical business applications.
