

CYBER RECRUITER

Advanced Resume Parsing Technology Saves Time and Generates Accurate Results

Cyber Recruiter advanced parsing frees recruiters from entering candidate data manually, enabling them to do what they do best, find candidates and fill open jobs. When a recruiter wants to import a resume from the internet, scanner or e-mail account they can clipboard the resume into Cyber Recruiter and the candidates information is parsed into the appropriate database fields.

Advanced Resume Parsing Options:

- Using the advanced resume parsing empowers the new Cyber Recruiter client. Visibility can convert new clients' existing resumes automatically, so that the client can get up and running quickly with Cyber Recruiter and leverage existing resumes.
- Once the client is up and running on Cyber Recruiter clients can enjoy the benefits and cost savings of automatic résumé processing. Use the advanced parsing option to quickly import resumes, populate applicant fields without keying them in and increase efficiency by allowing the recruiters to quickly create an applicant record so they can begin working with applicants immediately.
- Input File Types: HTML, PDF, DOC, TXT, RTF, many any other file types.
- The cost for the advanced parsing is affordable and starts at only \$500 per 1,000 resumes credits. It can be purchased for data conversion or to be used on an on-going basis (unused parsing units expire 12 months from purchase).

Advanced Parsing Extracts:

- **Candidate's Name**
- **Address:** Street Address, City, State/Province, Zip/Postal Code, Country
- **Email Address/ Web Site Address**
- **Telephone Number(s):** work, home, mobile, pager, FAX
- **Education:** School, Degree, Major, Minor, Dates
- **Skills:** Skill, Years Used, Year Last Used
- **Experience:** Worked Company, Position Title, Job Description and/or Summary, Dates, Industry
- **Objective/Cover letter**
- **Licenses/ Certifications Associations**
- **Security Clearance**
- **References**

Additional Functionality Now Available!

Starting in version 6.4 of Cyber Recruiter the applicant can upload their resume and have résumé parsing technology pre-populate an on-line applicant profile. Eliminating applicant manual data entry saves time and delivers a positive first impression. Candidates need only verify the populated information and click save. A clean, quick automated application process sets your organization apart from the competition.
