

## Does Your HR System Offer:

- Streamlined time entry?
- Overtime rules to aid administration of hours worked reporting?
- Integrated business processes?
- Online submission and approvals?
- Workflow and notifications?

Learn how Epicor HCM can do all this and more by contacting an Epicor representative today.

## **Timesheet Module**

## **Epicor HCM Timesheets Module**

Epicor HCM Timesheets provides an intuitive, Web-based time entry application for employees and managers to submit and approve time online. Managing an employee's work hours or time-off can be overlooked as an area with potential cost savings. Reduce data entry time by empowering employees to be responsible for their own accurate time reporting with the Epicor HCM Timesheet module. Managers can filter the time sheets by those submitted, not submitted or waiting for approval making the time worked approval process more efficient.

You'll be able to better manage costs because Timesheets has the ability to assign project codes to time worked, track exceptions, or allocate time spent working with other departments or at alternate locations. And employees enter time from the convenience of their own work station.

Epicor HCM Timesheets allows users to:

- Configure timesheets to reflect hours types, hours worked or exception reporting and overtime rules
- View a monthly calendar that illustrates employee coverage levels which helps to evaluate time-off requests
- Analyze work and absence trends
- Interface hours worked details to your payroll provider using HCM Link

If you're looking for an affordable, Web-based time entry solution, check out Epicor HCM Timesheets for an alternative time entry solution.
