Cornerstone
for Salesforce

Empowered learning for the social enterprise

Cloud-based learning
the way it should be

- Built 100% Native on Force.com
- Integration with Salesforce Chatter®
- Just-in-Time Training
- Social Collaboration and Learning
- Fully Accessible on Mobile Devices

In today's competitive market, winning or losing can often come down to having the right knowledge and information—at the right time. Global organizations are racing to connect with their customers and partners in new and exciting ways with the latest information about their products and services. But effectively doing so can be a challenge.

Introducing Cornerstone for Salesforce, revolutionizing the way the most successful teams share and deliver knowledge. Cornerstone for Salesforce harnesses the power of Force.com to empower the social enterprise with learning and training programs that sales teams, partners and customers need to maintain their competitive edge and drive business results. Cornerstone for Salesforce offers full compatibility with the Salesforce Platform's most popular applications including; Sales Cloud, Service Cloud, Customer/Partner Portal, Work.com and Salesforce Chatter.

csod.com/salesforce

Increase productivity and boost the top line with social and mobile cloud technologies

Deliver relevant sales training & education

Directly from Salesforce Platform, deploy high-powered training and onboarding programs for sales teams, employees, partners and customers.

Track effectiveness & ROI with Salesforce.com analytics

Certify sales and partner knowledge while ensuring compliance standards are met with Salesforce's configurable dashboard reporting and analytics.

Empower the social enterprise anytime, anywhere

Integrated with Salesforce Chatter, deliver anytime learning and real-time collaboration for sharing, recognition, and feedback—accessible from any mobile device.

Embedded in how salespeople work every day

Increase adoption and effectiveness from sales teams and partners by providing essential training directly within your Salesforce environment.
