

SAGE BUSINESS CLOUD PEOPLE

FOR MODERN HR AND PEOPLE COMPANIES

88% of organizations say that finding and recruiting the right people is their biggest challenge in terms of company growth.*

HR processes are changing. And, with the global skills crisis, HR Directors are struggling to attract and retain the best talent. Their departments are in flux, and 77% of organizations report a perceived lack of strategic value from HR.* If you're going to win the war for talent, your organization will need to make a radical change.

It must become a People Company and transform its HR. Use people data and analytics to make decisions based on real evidence to improve the way you interact with current and future employees to give them great workforce experiences. The result will be a more committed and engaged workforce, and increased interest in joining your organization. From a business perspective, too, you'll benefit through higher levels of productivity and efficiency, and improved performance and engagement.

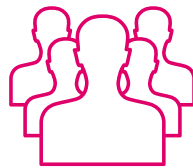

Key benefits

Instant workforce visibility

Leverage accurate people data to deliver actionable insights, for smarter business decisions:

- Single source of truth for all your people data
- Rapid evidence-based answers to your questions with People Science
- Monitor key metrics for your entire workforce
- On-demand access to real-time insights
- Easy integration with other systems
- Access from any device at any time

Great workforce experiences

Deliver great experiences to improve engagement, retention and productivity:

- Continually design new and better ways of working
- Mobile, on-demand self-service access
- Integrated communications and feedback
- Tailored and branded company portal

Productivity and compliance

Improve productivity by automating key tasks and workflows:

- End-to-end process automation
- Easy integration with third-party systems
- Rapid user adoption
- Set up using configuration; not code
- Automate global processes
- Deliver compliance with local laws.

SAGE BUSINESS CLOUD PEOPLE

FOR MODERN HR AND PEOPLE COMPANIES

What our customers are saying

"The Sage team is fantastic and I simply could not do my job without them! Our account manager is great at simplifying things and getting the system to work for us. My job is very demanding and, unfortunately, I haven't got enough hours, so I could not do without case support on a daily basis and Kate to help me implement very clever reporting, processes, notices and keep the look and feel of our site in check. Thank you so much guys!"

Josie Totti Da Costa, *Arma Partners*

"We picked the system because it was a good fit for our organization, which is global, fast-paced and changeable. We had confidence that it was flexible, we wanted to configure it rather than customize it. It was a cloud product which also fits into our IT strategy and it links up with other HR systems."

Head of Talent Acquisition and HR Systems, PaddyPowerBetfair

Welcome to the new world of people management. The changing nature of work and technology means that organizations must work harder than ever to engage their people, and enable them to do their best work.

Sage Business Cloud People will transform your organization into a People company. Not only will this help boost the strategic value of your HR department, it will go a long way toward unlocking future business growth for you.

An end-to-end system

The Sage Business Cloud People system covers the complete employee journey, right from the moment potential candidates engage with you. You and your workforce can experience immediate real-time visibility of information, and work with updates and changes that take place seamlessly and quickly. In addition, our solution is delivered via the Salesforce platform. You know it's secure, compliant and easy to introduce into new parts of the world.

Single version of the truth

Sage Business Cloud People gives you a secure single system of record for all your employee related data across multiple HR processes. With the full picture in one place, you have complete visibility of your workforce and easier reporting and analytics. Your people decisions are more informed, more accurate and more robust as well.

Automation

The automation capabilities built into Sage Business Cloud People reduce core HR transactional processes and tasks. Those in the department will spend less time re-keying things like performance review data. They'll have more time, accuracy and visibility, and that means they'll be able to deliver what employees really need. Employees, too, will benefit from better insights into their status, benefits and salary.

User-inspired design

The multiple generations that work together in today's workplace want flexibility. And they want to use the devices they're most comfortable with. Sage Business Cloud People takes these factors into account; it's designed to give people the best possible experiences—responsively and accessibly—whether they're working remotely, in the office or at a customer site. Your HR department and employees can access and manage all the information they need, wherever they are.

SAGE BUSINESS CLOUD PEOPLE

FOR MODERN HR AND PEOPLE COMPANIES

Easy integration

Sage Business Cloud People allows fast, easy and powerful integration. Data can seamlessly move between Sage Business Cloud People and other third-party applications, such as payroll. This cuts down on re-keying data, and reduces the risk of data duplication. As a result, it significantly increases accuracy and efficiency, and gives you a single source of truth for all your people data.

Rapid implementation

Sage Business Cloud People can be set up within weeks rather than months. Built on the Salesforce App Cloud, Sage Business Cloud People relies on simple user configuration that requires minimal or no training. For even faster implementation, we can provide “out-of-the-box” configurations. This helps customers achieve their objectives without going through lengthy discovery and implementation processes.

Compliance and security

Automate global processes and policies, while enabling regional teams to remain compliant with local regulations. With over 150,000 users in more than 140 different countries, Sage Business Cloud People is available in 14 languages out-of-the-box.

Sage Business Cloud People is compliant with ISO27001 and other legislations, and is specifically designed to protect the security and privacy rights for your people, helping you achieve compliance with local regulations.

Find out how Sage Business Cloud People can help you deliver amazing workforce experiences, and enable your people to do their very best.
